

ARDUINO OPEN 2016

This event is a battle of skill and technicality between **teams of two** who are expected to solve simple to complex problem statements based on their pre-existing knowledge of Arduino and interfacing with it . This fun-filled event will consist of two rounds.

Day 1: Round 1

This round poses 3 Challenging Problem Statements, to be solved by simulating in Arduino. More detailed instructions to be given during the event. The number of teams eliminated in this round will be announced during the event.

Judging Criteria: Total Score, Time taken

Day 2: Round 2

Qualifying Teams have to design a game using Arduino (description of game to be designed will be given). Again time is taken into account for the total score. As a bonus the teams have the option to Challenge other teams in the game they have designed for bonus points.
